ANTONIO SESSA

SENIOR QA ENGINEER

Senior QA Engineer with 10 years of experience across media streaming and marketplace platforms. Specialised in shift-left quality strategies, test automation, and bridging product, engineering, and customer care. Proven track record of reducing incident response time and scaling quality practices in Agile teams.

About me

"Give me a lever, a place to stand and well-done investigation, and I will move the earth." - Archimedes' semi-cit.

Curious by nature, I care deeply about how things work - and why they break.

That same curiosity drives me outside of work too, whether I'm framing a shot through a camera lens or digging into the mechanics of personal finance.

Hard skills

Strategy: Quality strategy · Shift-Left implementation

Engineering: Test architecture · Observability & monitoring

Collaboration: Cross-functional alignment · KPI definition & reporting

Used technologies

Testing: Postman · Cypress · WebdriverIO

Monitoring: Datadog · AWS Lambda · CloudWatch

Workflow: Asana · Jira · Confluence

Tools: Play Console · App Store Connect

Other: Typescript · Figma · Miro · Zapier

Credentials

ISTQB® CT-TAE - 2023

ISTQB® CTFL - 2023

PSM™ I - 2020

FCE English B2 - 2015

Engineering License - (A) - 2015

Italian - Native

English - B2 · daily professional use

Interests

Personal finance · Photography

Experiences

Senior QA Engineer — ProntoPro

ProntoPro S.r.l. — Jan 2024 - Present

Promoted to Senior Engineer S2, now I sit at the intersection of product, engineering, and reliability, contributing to both technical and product roadmaps and acting as a bridge between Customer Care and Engineering.

- Built a **Company Status Page** for real-time system health monitoring, reducing incident response time
- Developed a **TypeScript toolkit** to generate test scenarios at scale, orchestrated in **AWS Lambda** and monitored via **CloudWatch + Slack**
- Embedded quality from inception through a full **Angular to React and React Native replatform**, translating early design-phase involvement into a zero-regression delivery at scale.

QA Engineer — ProntoPro

ProntoPro S.r.l. — May 2022 - Dec 2023

I joined ProntoPro to bring quality upstream, adopting a Shift-Left approach that involves QA from the design stage, not just at the end of a sprint.

- Active participation in backlog refinement to catch ambiguities early
- **Validation and verification** of new features developed
- Designed and coded an **automated e2e test suite** using Cypress and WebdriverIO

QA Test Lead and **Business Analyst** at Sky Italia

Netcom Group S.p.a. — Jan 2017 - May 2022

Over five years at Sky, I grew from individual contributor to **team lead**, managing a group of manual testers while owning the broader quality strategy across product and engineering.

- Managed **Field Trial feedback** from real users and fed insights back into the product cycle
- **Supported Incident Management** for Sky Go's live customer base

QA Test Engineer at Sky Italia

Netcom Group S.p.a. — Sep 2015 - Jan 2017

My professional starting point: this role gave me a rigorous foundation in structured software testing and taught me to work methodically under delivery pressure - a mindset I've carried through every role since.

Education

University of Salerno — 2013 - 2015

Computer Engineering Master's Degree - **Final grades 110/110**

Thesis: "Graph matching algorithms for Social Network Analysis"

Designed a synthetic dataset to benchmark graph matching algorithms on complex networks - an early exercise in structured test design, performance evaluation, and analytical rigour that directly anticipated the QA mindset I've built my career on.
